

**Cinematic Loops** is an epic collection of royalty free sounds for film music composers and electronic music producers. Crafted by Particular-Sound, the library is perfect for composing cinematic soundtracks, underscoring, or simply adding a bit of blockbuster movie flavor to your music.

The included audio loops are inspired by modern sci-fi, thriller and action movie trailers and soundtracks, with a contemporary electronic music vibe. Packed with thrilling synth sequences, heavy dubstep beats, epic sound effects and a variety of glitchy digital noises, Cinematic Loops is the perfect addition to your cinema scoring toolkit. Of course, the included loops will also work well for use in video game soundtracks, YouTube videos, as well as electronic dance music production.

## Contents

99 audio loops

24-bit WAV format

44.1 KHz stereo

ZIP archive

## **LICENSE**

The included samples were crafted by Frank "Xenox" Neumann and are royalty free for use in your music, video game development, videos and other creative projects, both free and commercial. You are not allowed to redistribute these samples (as in share or sell them on other websites), nor use them as the sound source in audio related software and/or sound libraries, free or commercial.
